☐

Cloud Bigtable

☐

Dataproc

☐

BigQuery

checkDataflow

Dataflow is a serverless managed service that can perform ETL operations on batch and streaming data using the Apache Beam SDK.

check

3.

Which managed service should you use if you want to do a lift and shift of an existing Hadoop cluster without having to rewrite your Spark code?

☐

Cloud Bigtable

checkDataproc

☐

BigQuery

☐

Dataflow

Dataproc is the best option if you want to take your existing Hadoop cluster and build something similar in the cloud.
